

Audionamix releases the first speech-specific separation software TRAX Pro 3 SP at Musikmesse.

LOS ANGELES (April 4, 2017) – [Audionamix](#), the industry leader in audio source separation, and creators of [ADX TRAX Pro](#), [ADX SVC](#), and the award winning [ADX VVC](#), officially release the world's first speech-specific, stand alone separation software, [TRAX Pro 3 SP](#).

TRAX Pro 3 SP is a new automated speech separation solution, the latest in a long line of groundbreaking tools from Audionamix. Isolate speech from background elements in mono or stereo recordings. Separate speech from any kind of noise, improve speech intelligibility in archival recordings, seamlessly clean up dialogue in film post-production without the need for ADR, and much more. TRAX Pro 3 SP is the most comprehensive and only powerful speech and melodic content separation tool to hit the market.

With the release of the new speech-specific platform, Audionamix will also make a lite version available at a lower price point. TRAX 3 SP includes all features of TRAX Pro 3 SP with the exception of the additional spectral editing capabilities. For more information visit <https://adx.bz/pr-sp-launch> or find Audionamix inside the Hyperactive booth – Hall 9.1 Stand E54 at Musikmesse in Frankfurt, Germany.
